Response to Arguments

The amendment to the specification, found on page 2, filed on 9/27/2007 which is entered.

Applicant's arguments, see pages 5-6, filed on 9/27/2007, with respect to the amendment to claims 1, 2, 4-6 and 8-11, found on pages 3-4, have been fully considered and are persuasive. The rejection of claims 1, 2, 4-6 and 8-11 has been withdrawn.

Reasons for Allowance

Claims 1, 2, 4-6 and 8-11 are allowed over the prior art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Holmberg et al (US 5,123,847) teaches an improved the active matrix display backplanes with thin film transistors thereon and a drive scheme therefor. Holmberg et al (US 4,820,222) teaches a method of manufacturing flat panel backplanes including improved testing and yields thereof and display made thereby.

The following is an examiner's statement of reasons for allowance: with respect to the independent claims, the prior art of record does not fairly teach the claimed "a backplane for an electro-optic display comprising a capacitor electrode disposed adjacent the voltage supply line such that the capacitor electrode and the voltage supply line form a capacitor" along with the other claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
